OIL**

5 Gallon Bucket

The Only System In The Market That Uses
A 5 Gallon Bucket To Both Extract And
Winterize In One Step

Extraction Winterization

One Step Processing Botanical Oil
2-4 Pounds Input Bontanicals Per Hour
48-96 Pounds per Day 24/7

PRODUCT

One step modular processing cart to both extract and winterize your botanical.

Modular cart mounted system provides good work flow in the one step process. Flip-up table provides extra work surface and easily cleaned. Fits through any standard door, hallway, and elevator.

Consumables CO2 and ethanol.

Hands free high-tech magnetic mixing.

Plug-and-Play cart ships in a sturdy crate for roll-out operation, delivered to your operation by lift-gate insured freight. Plug into 110 V 60 hz outlet to begin.

PROFIT

Processing input botanicals of 2-4 pounds per hour for the market desired Full Spectrum Oil.

Fast Chill down to -70 F and lower using innovative chiller technology.

One step process to extract and winterize in a 5 gallon bucket. System has two 5 gallon bucket capacity.

Pour winterized solution with botanicals into the Infinity Fast Filter system for a market ready product, a Full Spectrum Oil.

Sell residual wax to health products manufacturers.

Make more profit by streamlined processing.

TIME

In about an hour you can process 2-4 pounds input of botanicals into market salable Full Spectrum Oil.

Reduce processing time from days to hours to finished product, ready for sale.

Save time by combining extraction and winterization into one simple process.

Save labor time by using our one-step extraction and winterizing process.

Time savings results in more product for less cost, which means more profit potential in your pocket.
